MobileIron MobileIron for KNOX

MobileIron and Samsung are working together to provide the most secure and powerful mobility solutions for the enterprise.

Solution Overview

- App, document and device management for the KNOX platform
- Complete separation of work and personal data
- Most flexible and scalable deployment options in the industry

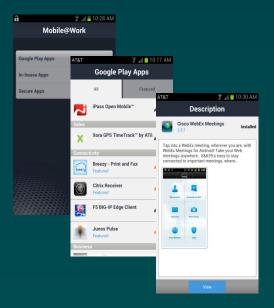

Solution Benefits

- Deploy KNOX platform devices across any organization
- Conform to the latest government & industry regulations
- Allow BYOD or corporate-owned deployments
- Set policies to safeguard data from loss
- Selectively wipe secure content on loss or device retirement
- Manage the end-to-end mobile app lifecycle
- Integrate KNOX APIs to become a Mobile First organization

Solution Features

- Containerization of work apps and data
- Preserves the native Android user experience
- Automated email configuration and attachment security
- Easy to deploy and secure any app for work use
- Simplified certificate management and deployment
- Robust API for 3rd party integration
